TECHNICAL EXPERIENCE

Internship

- **Summer Research Intern at IIT Kharagpur (May 2018 - June 2018) -** The objective of the project was to develop a webapp for decision support system using **Django** that would help to visualize real-world supply chain data enabling better analysis and understanding of the data. The **d3.js** library was used to make different layouts and the layouts were integrated with the Django webapp.

Projects

- **Weather Portal:** A simple python CLI script that displays the weather of a city.
- **Music Upload Website:** A website with a functionality to upload and listen to songs, with models for songs and albums. It is built using Django framework.
- **Movies Information:** A simple python utility script that gives movies' information, rating and date of release.
- **Polling App:** A Django app to conduct a poll where user can vote for a question with multiple options.
- **SMS Scheduler App:** A Django based web application where a user can set his/her number and the app sends an SMS after a fixed interval of time (except during night), using Twilio web services. The implementation was done using cron-job.

ADDITIONAL EXPERIENCE AND AWARDS

- **1st runners up** in **Smart India Hackathon 2017** organized by Government of India under AICTE.
- **Winners** in **Hackathon** organized by GLUG committee of NIT Durgapur in **MUKTI 2017**.
